Research and Education in Digital Libraries

Questions for discussion

Vittore Casarosa
ISTI-CNR, Pisa, Italy

ELAG 2011, 25-28 May 2011, Prague, Czech Republic

Research and Education
What can we learn

- Discussion to understand what are the aspects of research in Digital Libraries that can affect in a significant way education in Digital Libraries.
  - What can we learn from the completed research ?
  - What can we learn from the practice/curriculum content that exists?
  - What additional research is needed?

- Can we make an analysis of the development of Digital Library education programs in the U.S. and in the EU to identify similarities and significant difference in approach ?

Research and Education
Which role

- Discussion on how results of research in Digital Libraries can be timely transferred to education in Digital Libraries, e.g. how to implement a European scale mechanism for exchanging, sharing and integrating research results into education.

  - Which role can various organizations, institutions play?
    - Regional and National Organizations/Associations
    - National and multi-national Governments and organizations
    - Research institutions

  - Which role can different communities play?
    - Computer scientists
    - Professionals in Library, Archives, Museums
    - Educators in Library Schools

Research and Education
What can we report

- Report to be distributed to the research and education communities interested in Digital Libraries, for furthering the discussion of those topics.

How can we develop realistic recommendations for the future?
